THE BEST PLACE TO CONNECT WITH AMERICA'S LEADING MINDS IN POWER

Bigger, better, best! With a core focus on energy transition in the power mix and interconnection, 2022 is all about resilience and reliability of the grid. Interactive session formats and longer networking times allow you to connect with everyone at the event, and still have time to learn something new about your industry!

WHAT TO EXPECT THIS YEAR

Join the conversation as we dissect the current and future state of power generation in the US and how competitive pricing, innovation, and advanced deal structuring will be successfully delivered in light of net-zero and federal plans.

WHO WILL WE MAKE SURE YOU MEET?

- ★ TOP LEVEL TRANSITION EXPERTS
- ★ DEVELOPERS
- ★ FINANCIAL SPONSORS
- ★ INSTITUTIONAL INVESTORS
- ★ INFRASTRUCTURE FUNDS
- ★ COMMERCIAL LENDERS
- ★ PROJECT SERVICE PROVIDERS
- ★ LAW FIRMS

An event that is dedicated to facilitating introductions and meeting with current clients within the US Power and Renewables market specifically

Access to that all-important delegate list well in advance of the event so you can reach out and arrange meetings

Senior level speakers discussing the most pressing issues facing the market - expect to see the best CEO's and Global Heads experts in their field!

Additional networking activities around the main event including industry cocktail reception and ice-breaker drinks on the evening of 2nd

TOP TAKEAWAYS FROM 2021

1

Despite ostensible support from the federal government from the renewable energy and a confirmation of commitment to energy transition within the United States, some areas around capital deployment and effects on the market still seem very unclear as the bill has a far reaching mandate

2

Resilience and reliability are tied; grid systems have been plagued by climate related reliability issues. Without the flexibility of multiple generation source technology working together on the grid, we open ourselves up to continued problems.

3

Outdated power lines and access to interconnection sites paired with more frequent extreme weather have highlighted that transmission infrastructure investment is critical for a viable fully electrified system.

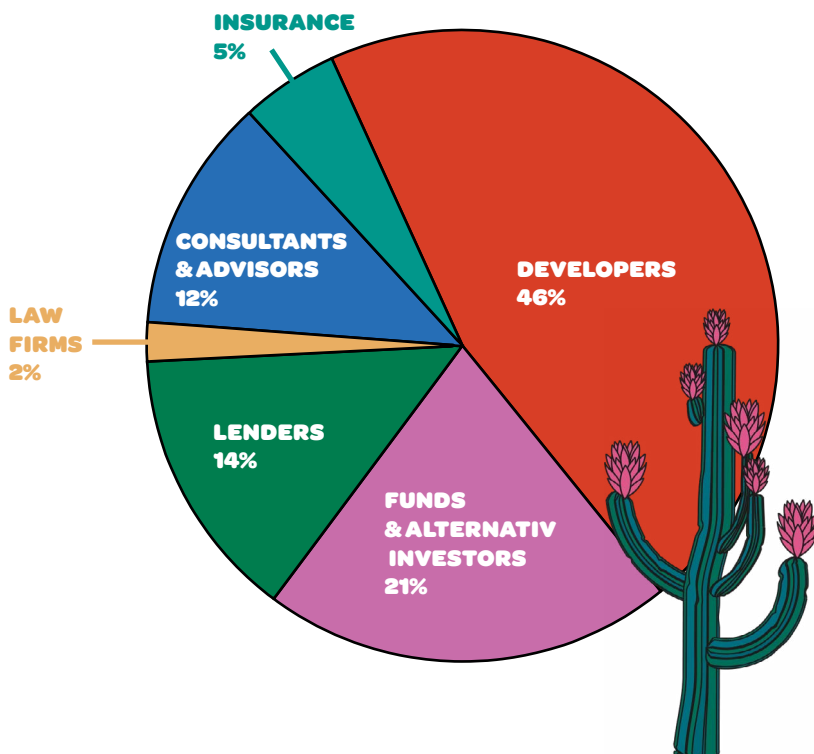

4

New technologies continue to find new decarbonization pathways but financing structures, credit committees and regulatory standards often stand in their way. Bi-Directional EV charging, hydrogen, long duration storage for example still seem out of reach without better support.

5

To be sustainably impactful, power projects must generate more than just power & returns. A broader socio-economic impact is necessary to create continued job opportunities and perpetuate the transition to carbon neutrality.

2021 ATTENDEES

"...An excellent opportunity to interact with other industry participants and stay abreast of the latest developments. The format was creative, providing content that was both fun and effective."

Robert Freedman
PAUL HASTINGS

"The event brought together a wide variety of professionals and was a true marketplace that gave people a chance to meet the right individuals and advance their capital networks. Great combination of capital providers and other principals plus very thoughtful presentations that were extremely topical."

Nazar Massouh
ORION ENERGY PARTNERS

"Nice size conference allowing for good networking and interesting content, very creative panel structure."

Jason Kahan
BASALT INFRASTRUCTURE PARTNERS
